

*You wanted a chance to prove yourself.  
Here it is. SAP's The Code Slam.*

[Register now](#)

SAP hosts the first global coding challenge:

*SAP's The Code Slam on October 13<sup>th</sup> 2012*

It's your time to be a little show off and represent yourself as creative thinker, a unique personality with excellent coding skills.

**Work online or onsite at your university** on tough, challenging coding problems. Introduce us to your innovative, straight forward code solution. You can program the algorithms in different languages including C++ C#, Java, Ruby, Python, Erlang and more. Stay tuned on [our page](#) for more information.

No matter if you are an experienced, international programmer, a student, a newly minted graduate or a programmer who looks to jump start a career, **everyone is welcome to participate** in either the virtual or the on campus part of our Code Slam.

You don't know who we are?

SAP helps companies of all sizes and industries run better. From back office to boardroom, warehouse to storefront, desktop to mobile device, SAP empowers people and organizations to work together more efficiently and use business insight more effectively to stay ahead of the competition. We do this by extending the availability of software across on-premise installations, on-demand deployments, and mobile devices.

Are you ready to run at your personal best?
